

A simple change. A powerful solution.

H2O3

Get on the right side of science.

The post-pandemic “new normal” poses numerous challenges for businesses across a broad range of industries. The focus on health and safety of customers and employees has never been greater, while consumer awareness of best practices in sanitization and cleaning has never been higher.

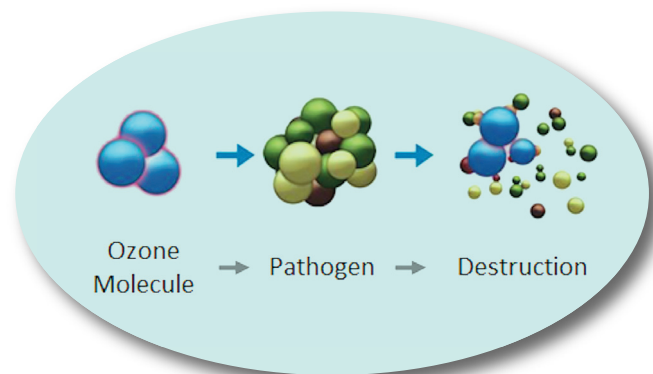

With these challenges, however, comes an opportunity...H2O3.

There has never been a smarter time to make the switch from expensive and potentially toxic chemical-based cleaners and disinfectants to water-based SAO—Stabilized Aqueous Ozone—which is 100% effective at inactivating pathogens common to your industry.

The H2O3 Stabilized Aqueous Ozone system:

- Destroys viruses and bacteria in seconds on topical surfaces, including SARS-CoV-2, MRSA and E. coli and is ideal for any COVID-19 Response Program
- Pays for itself quickly by replacing 95 to 100% of all your current cleaning products
- Installs easily and uses your tap water and electricity
- Requires no new cleaning equipment or employee training
- Laboratory tested & government regulated
- Leaves no residue and is safe and effective against pathogens
- Tough on dirt and germs...safe for people

Stabilized Aqueous Ozone—produced on-site and on-demand by the system from H2O3 retains its pathogen-killing power for up to 24 hours. Wherever you use cleaning and sanitizing products now, SAO is stronger than bleach, yet without the toxic fumes and residues that come with traditional chemicals.

The stabilization technology was developed by Tersano more than 15 years ago and has been deployed in over 30,000 locations around the world, including hotels, universities, hospitals and apartment complexes.

We have completely replaced all of our conventional chemicals with SAO, and find new ways to clean, sanitize and deodorize every day.

—Luisa Garcia • First Service Residential • Property Manager

We use SAO to fog the dining room, kitchen, on tables and other surfaces touched by guests and employees. Ask any member of our team and they will tell you why they feel more protected at Sophia. SAO keeps us safer!

—Glenn Keefer • Sophia Steak • Founding Partner

SAO has proven to be very versatile in applications, including our indoor turf field, yoga and stretch mats, fabrics, furniture and carpets, as well as targeted applications in restrooms, locker rooms, and training areas.

—Thomas Loger • East Bank Club Chicago • Housekeeping Manager

You have worked hard to establish the value, quality and service offered by your business—and maintained those high standards throughout the pandemic. With H2O3, you'll create a Culture of Sustainability that lets your customers know you're safe, sound, clean and green...and on the right side of science.
